👤 PROFILE

Backend Oriented Full Stack Developer | Node.js, REST APIs, MySQL

Builds production style backend systems with a focus on API design, authentication, and reliable service architecture. Experienced with Node.js, Express, and MySQL, with hands-on experience in full-stack development using React.

Strong focus on clean code, separation of concerns, and building systems that handle real-world scenarios. I bring a disciplined and methodical approach to problem-solving, with a **strong commitment to best practices and continuous technical growth**

📦 PROJECTS

Fullstack & Backend Projects

Vacations Are Us - Full Stack Web Application

Live Demo 🔗 | GitHub 🔗

- Designed and implemented a production style full stack application with a **RESTful backend built using Node.js, Express, and MySQL, and a React + TypeScript** frontend following **layered architecture principles**, supporting admin and user management workflows.
- Structured application layers (controllers, services, data access) to ensure **maintainability** and separation of concerns
- Implemented **JWT authentication** and role-based access control.
- Implemented real time updates with **Socket.IO**, and **Dockerized** the application for deployment

AI Gateway API – Multi-Provider AI Platform

GitHub 🔗

- Designed and developed a **FastAPI based backend service that routes requests** across multiple AI providers (Gemini, Groq, HuggingFace)
- Implemented **fallback logic** across AI providers, improving system reliability under failure scenarios
- Added in memory **caching** to reduce redundant API calls and improve response time
- Tracked request latency and exposed response metadata for observability

🧠 TECHNICAL SKILLS

Backend

Node.js, Express, Python (FastAPI, Flask), REST API Development, JWT Authentication, Sequelize ORM

Databases

MySQL, SQL, Relational Database Design

Tools

Git, GitHub, Postman, Docker, VS Code

Backend Capabilities

Authentication & Role-Based Authorization, Request Validation (Joi), Real-time updates with Socket.IO, File Upload & Cloud Storage Integration (AWS S3)

Frontend

React, TypeScript, Redux, JavaScript (ES6+), React Router, Bootstrap

📖 COURSES & EDUCATION

Full Stack Web Development – John Bryce

05/2025 – 01/2026

- Intensive (950+ hour) hands-on training in full-stack web development, covering frontend–backend architecture, REST APIs, authentication, relational databases, and deployment workflows. Included practical projects with focus on clean code, modular design, and scalable application structure.
- Psychometric Entrance Exam:** [754]
